Dispatch SOP - Ross

🕒 Monday, February 16, 2026 at 3:34:46 PM

Hey Alex,

I've been working through the identified resource allocation impediments for the Carolinas region and adjusting the orders per our new guidelines. While removing the requested personnel to improve dispatch efficiency, I found four specific cases where a deviation from the initial report is either necessary for operational success or where updated data now aligns with our SOP.

Below is an update on those specific orders:

Retained Mappings (Efficiency & Logistics)

- **Order 659427 – Danny Partin II & Jude:** While Danny is technically being underutilized (ACL on a CL order), they are only 33 miles from the mapping. The closest available CLs are in SVA (68 miles) or WNC (82 miles). Keeping Danny on this order secures both the CL and CM positions while keeping all employees under the 45-air-mile threshold, making this the most efficient option currently available.
- **Order 666193 – Don-nel Green:** Although previously noted as 114 miles away, the mapping relocated earlier this week. Don-nel is now back within his air-mile limit, so he has been kept on the order as he now aligns with our SOP.
- **Order 659970 – William Devlin (FT1):** While this order is distant for most trainees, there are now two trainees from the 2/6 class who are within range. William can now train effectively on this mapping, so I have left this in place.

Modified Mappings

- **Order 659830 – Herman Brown (FT1):** Similar to William, Herman was quite far from the majority of BWZ trainees, with only one trainee from the 2/6 class nearby. I have removed Herman from the mapping; however, I will allow him to remain for the next two days to ensure he can effectively finish training Tyler Byrd.

Justin Puffpaff Flagger Force | Resource Allocation Specialist

Good Morning,

We have identified several areas for improvement for mapped employees across the Carolinas. This has led to significant challenges in dispatching in the Carolinas, causing ACL shortages throughout the week and little flexibility for my team to staff orders efficiently. I wanted to make you aware that the below orders will be adjusted starting next week to set the region up for better success and increased efficiency. The team will be reviewing the below orders today and selecting different employees that will increase our dispatch efficiency.

Summary

This report identifies specific resource allocation impediments within the Carolinas region. The data highlights instances where requested personnel are geographically overextended from their mappings or where there is a underutilization between the individual's role and the order requirements.

1. Role Inconsistencies (Underutilization)

The following orders show a discrepancy between the mapped personnel's current title (ACL) and the required role for the order (CL).

Moving forward, all mapping requests will be evaluated against the following criteria:

- Role Alignment – Employees must be mapped to roles that match their qualifications. ACLs cannot be mapped to CL positions.
- Geographic Limits - CL and ACL mappings are limited to 40 air miles from the employee's home address
- Crew Member Mappings are suspended – No new Crew Members mappings will be approved. Existing CM mappings will be honored at this time.
- One mapping per Employee – Employees can only be mapped to one order at a time.
- Business Justification – All new mapping requests must include a clear business reason for the request.

If you have questions, please let me know.

Thank you,

WNC - order 661728

🕒 Monday, February 9, 2026 at 8:41:57 AM

I wanted to provide full transparency regarding the adjustments made to staffing for the pre-construction work. Based on guidance from my leadership team, we were asked to prioritize orders requiring heavy equipment. In situations where a crew could still begin work with a single lead, we were encouraged to make temporary reallocations as needed to support the larger project. With that direction, I reassigned the following ACLs: Jacob Hardy, Curtis Rader, Zaire Farmer, William Pulliam, and Donald Garner. Each of these ACLs had another lead already assigned to their job and did not have equipment on site. With my leadership's approval, this approach allowed us to complete the pre-con requirements while still ensuring that the remaining orders could move forward in the field. These adjustments help us maintain efficiency and meet time constraints until replacements are in place. I appreciate everyone's flexibility and support as we work through these priorities.

Good afternoon,

Please see attached for information on the new hires from today's class in Charlotte, NC. Of the 3 invited to class, 2 showed, and 2 were hired.

1 were sent home for the following reasons:

- Candidate did not have radios for class and could not obtain them for crew member training.

Out of the 2 that was hired, one of them is an experienced new crew member.

Please let me know if I can provide any additional information.

Dispatch Corrections Needed

Email

🕒 Monday, February 9, 2026 at 8:08:04 AM

Hello,

There are several issues with our orders for next week. Mapped employees are not currently assigned to their mapped orders. Can we please ensure these items are corrected as soon as possible?

Rashaun Henry is mapped to Order 659591 but has been placed on Order 659904 for the entire week.

Herman Brown is mapped to Order 659830 but has been placed on Order 661987 for the week. I do see he has been removed for Monday; however, he has not been added back to his mapped order for Tuesday through Friday.

Wayne McElroy and Wesly Mace are both mapped to Order 660036, but Wesley has been dispatched to Order 662254 for the entire week, and Wayne has not been dispatched to his order for Tuesday – Friday.

Devin Greeson and Daniel Paul are supposed to be mentor/mentee. I am currently working with ES to address this, but Daniel needs to be placed with Devin on Order 659904 for Monday and Tuesday next week.

Additionally, Devin advised that he was promised work in Highlands, NC for the entire week by someone at OSC; however, he has been removed from those orders. Is there a reason Devin and Daniel were removed?

This is everything I have identified so far, other than Tuesday's dispatch not being completed as of yet. Can we please get these corrected as soon as possible?

Thank you for your attention and assistance.

travel help request - SHONDA

🕒 Monday, February 9, 2026 at 8:08:04 AM

Hello,

We currently have two Infratech orders in Highlands, NC (Orders 662302 and 660960). Currently, the only available nearby resources are employees from South Carolina. Unfortunately, we were unable to fill Order 662302, and today we could only staff 2 of the 4 required positions for Order 660960. South Carolina has a limited number of employees, which is creating ongoing coverage challenges.

Order 662302 is scheduled for the next two weeks, and I want to avoid daily service impacts throughout the duration of this project. Additionally, Order 660960 has been impacted for the past two days.

Is there any possibility of securing travelers or additional support to assist with coverage for these orders?

Please let me know how we can best move forward. Any assistance is greatly appreciated.

Thank you,

Shonda Smith Flagger Force | Field Manager

Foreman Miguel Delgado Order 662344

Email

🕒 Monday, February 9, 2026 at 8:08:03 AM

Hello,

Can someone please address and resolve this ongoing crew mapping issue? We were able to retain four orders with ULCS from Wright with the agreement that the following employees would remain mapped to Foreman Miguel Delgado Order 662344:

Markus Jones
Adrian Hickman
Delonte Glover

However, this has continued to be a problem, as these CMs are repeatedly being moved to other orders. The client has advised that if they must continue reaching out to me to correct this issue, they will consider moving the work back to Wright.

Is there anything I can do on my end to help prevent these mapping changes from occurring? I would appreciate any immediate assistance in stabilizing this situation.

Thank you,

Thank you for reaching out and sharing your concerns regarding local personnel utilization.

To provide some context on the recent scheduling shifts, both Patrick Locke and Jason Ayers were moved to the Highlands orders because those specific jobs were identified as critical priorities. Due to significant impacts in that area, these orders required precise attention and distance utilization to ensure successful completion.

During this period, we faced exceptionally high order volumes and unforeseen variables following the weekend. To meet this demand, we successfully filled all orders across the Carolinas by utilizing over 90% of our total human and equipment assets.

While my primary goal is always to keep field staff within their local markets, there are instances where I must reallocate resources cross-market to ensure our highest-priority commitments are met. This was a strategic move to ensure total operational coverage and client satisfaction during a period of peak demand.

I appreciate your understanding of these logistical challenges as we work to balance local preferences with critical business needs.

Best regards,

Good evening, Mike,

I am writing to inform you that we do not have the available resources to complete the EO job scheduled for tomorrow in New Bern (Order 663119).

The order was input into TDOC at 5:29 PM on Friday, 1/16/2026. Based on the order audit history, as of Sunday evening at 5:56 PM, no dispatch attempts had been made. The last activity on the order was by Sherron, who entered the order into TDOC. At this time, I am unable to pull employees from existing assignments, as doing so would negatively impact our routine operations for both Monday and Tuesday.

I had hoped to secure traveling resources to support this job; however, with just over 24 hours before the job starts, it will be very difficult to get personnel in place. Additionally, if this job would be filled, this job would require hotel accommodations for the majority of the employees involved.

Please advise on how you would like to proceed and what the next steps should be.

Thank you,

🕒 Tuesday, February 3, 2026 at 4:07:23 PM

Hello,

I noticed some mapped leads are not on their mapped orders. It looks like some may be due to the mapped leads being SEO. However, I see where changes can be made and it will not affect the orders. For example, David Martin is extremely difficult, and we need to keep Markus Dickens on that order. Please see below my recommendations, this will fill our orders without impact and mapped leads can be on their mapped orders.

Order 659895 – Foreman David Martin
Please add Markus Dickens to this order he is mapped.

Order 659667 – Foreman Bill Ware
Please add Michael Musumeci and remove Daquante Jones. This mapping was changed and Michael is showing mapped, but he is not on this order.

Order 659770 – Foreman Derrick Samuels
Please remove David Pender, add Tracy Evans, and assign Tracy the AP. David can then be added to order 660738 to replace Markus Dickens in the TMA.

Can we please make these changes, this will fill the required positions and mapped leads will be on their orders.

Hello,

Riley Bruno has been mapped to **Order 661059** for some time now. I am not sure what occurred, but it appears she has been removed from this order for the current week.

Is there a way we can have Riley added back to her mapped order? I have received 2 calls from the foreman about this since yesterday.

Thank you for your assistance with this,

Challenge -SHONDA

🕒 *Tuesday, February 3, 2026 at 4:07:23 PM*

Hello,

We continue to experience ongoing staffing challenges in these areas. Most locations regularly have call-offs, and at times it is difficult to backfill call-offs or NCNS situations.

I understand that mapping entire crews is not something we want to do routinely. However, should we consider mapping 2 or 3 of the 7 crews currently working in these areas to help improve coverage and consistency?

I'd appreciate your thoughts on this approach.

All mappings should be match required role and distance should be 45 miles or less, ideally.

Ross Miller Flagger Force | Senior Operations Logistics Manager

Team,
We made arrangements with the client today after having to remove the mapping that was already in place with an ACL. I want to be very clear — I am not going to inconvenience this client any further or put us in a position where we appear ill-prepared by making additional crew changes.
This adjustment was made at Ross's request this morning.

Michael Alexandersen Flagger Force | Field Manager

After reviewing the recent updates, I noticed that Nebraska's original requested order (#659938) was assigned at 1 CL. To ensure we are utilizing resources appropriately, I recommend replacing Nebraska's order with the same standard capacity rather than allocating an ACL that may not be required.
Thank you for your understanding,

Jeff is mapped to another order as well I will unmapp both im just concerned we are moving a lot of already stationed requested people instead of utilizing other Leads nearby.

The client has been notified of the change and Joel is aware also this is per Ross Miller. Please list Jeffery Hamm as the mapped lead on WO#659938 and Nebraska Wiggins to WO#661966.

Hello,

Please see below order increases for next week. I have copied the client for visibility.

Order 659893 Foreman Bryan Bowman – Please increase by 1 CL and 3 CM's Monday – Thursday of next week. They are flagging a 4-way intersection.

Order 665327 Foreman Adrian Hernandez – Please cancel Monday 2/16, he will be working Tuesday – Friday. However, Tuesday – Friday Adrian will need to increase his order by 1 CL, 2 CM's, 4 TMA's and 2 AP's, for a total crew size of 2 CL's (mapped Jaeylah Collins), 6 ACL's (2 with SEO Certs) and 4 CM's.

Order 659628 Foreman Zach Absher – Please change his address back to 6151 Westfield Road Westfield, NC effective Monday until further notice.

Order 665866 Foreman James Hicks – Please remove Reva Nusbaum and add Joel Rouse, Joel is the new mapped ACL. Also, CM Tracy Pipkin is the job lead and should not be as she is a CM. Joel Rouse needs to be the job lead. Also, this order needs to be increased by 1 ACL with 2 AP's for next week (Monday – Thursday). Also, can we add Donald Garner as the 2nd ACL with AP as he was there today with Joel and knows the set up.

Order 659643 Foreman Scottie Layell – Please increase his order by 1 ACL and 1 AP Monday – Thursday.

Thank you,

Hello Teams,

ENC CM (PRI 30790) Corey Seamster keeps getting sent order 660740 to do Field Training w/ a FT William Pulliam. Due to not having a POV at the moment, an issue that he stated he has brought up to field leadership. He will not be able to drive out to the jobsite for anything outside of this Timberlake Order, of which he is able to get transportation to.

He was dispatched for this training yesterday and received an Inactive Refusal while he was waiting for a response from the lead to ask if he could get a ride to site. He was then again dispatched this order today for tomorrow's training.

It seems to me that unless a FT/CL can pick up Corey to bring him to the job site, the only way that we will be able to utilize Corey as a CM is on his mapped Timberlake, NC job (659833). Is it possible to reschedule his field training until he gets his POV back, so he can be utilized on 659833?

I have CC'ed Corey's Field Leadership so they can be aware of any potential training rescheduling.

Best,

Jake

Alex,

Reginald Payne is mapped to order 659893 (9 miles from) but has been moved to another order 661063 for tomorrow (27 miles from). There is no apparent reason for this. He was replaced with Christopher Jones on his mapped order who is not a field trainer and Christopher Jones would be closer to 661063 than the order they put him on to replace Reginald.

I just got a call from a very upset General Foreman wanting to know why the mapped lead was pulled from one of his foreman's orders. Can you please get Reginald put back on his mapped order for tomorrow.

Good morning,

I have a quick question regarding two of our Groves orders that were placed on LOM for the entire hitch (Thursday 02/12/2026 through Thursday 02/19/2026). We understand and expected the LOM status for today; however, we were under the impression that it was intended for today only. Could you please help clarify whether the full-hitch LOM status was intentional or if an adjustment may be needed?

Thank you,

Hello,

I was doing some research for this order and found that the zip code was transposed by Kyle Lynch. This order is supposed to be in Raeford, NC which is in ENC and not Glenville, NC. Danielle is fixing the address now.

Hello,

I apologize for the miscommunication, however we were incorrect in the distance and the below folks would need hotels to fill this order, it would be 3.5 hours away from where they live.

Again, I apologize for the confusion.

Good morning,

I just saw that Aaron Jones with Groves Electric placed an order starting today through 2/19. We are not going to be able to fill it today. This has been completed I would also suggest placing a restriction in with that foreman/client so she won't be placed on accident or have the chance to accept the job via job board.

- Also I didn't place her on the Greenville order for Friday only because there were available ACLs closer not breaking that 100mile distance.

Please reach out if anything further is needed thank you for your consistent guidance.

Good morning,

[@OSC Resource Allocation Specialists \(mailto:oscresourceallocationspecialists@flaggerforce.com\)](mailto:oscresourceallocationspecialists@flaggerforce.com) Please map **Ned Hudson** to order **662355**, as he is an ACL mapped to an ACL job.

When Ned is removed and replaced with a CL, the CL does not have the proper signage required to complete the job. This creates the potential for a severe client impact due to improper equipment coverage.

To prevent this issue moving forward, [@General Orders \(mailto:Orders@FlaggerForce.com\)](mailto:Orders@FlaggerForce.com) please upsize the CL spot to an ACL and reflect **Ned Hudson** and **Brandon Mastrapa** as the requested crew.
